EXPERIENCE

Full-Stack Developer, *Freelance* 07/2024 - Present
Kyiv

- Develop responsive websites and web applications with React, TypeScript, SCSS and JavaScript
- Build full-stack applications with Next.js, Node.js, PostgreSQL (Prisma) and Supabase, including authentication and database design
- Integrate REST APIs, manage application state and ensure cross-browser and mobile support
- Write clean, maintainable, reusable code and deploy projects to Vercel / GitHub Pages
- Communicate directly with clients: gather requirements, agree scope and deliver on deadlines
- Build AI-powered automation workflows with n8n, integrating LLM APIs (Claude, ChatGPT, Gemini, Groq), REST services and cloud functions to automate data processing and business logic

Full-Stack Developer, *Glovo* 04/2023 - 07/2024
Remote

- Developed a courier-facing web application: order list, order details and delivery status tracking, built with React and JavaScript
- Built reusable UI components (order cards, status indicators, forms) and managed application state
- Implemented server-side logic: REST API endpoints for orders, couriers and delivery statuses, with data stored in a database
- Integrated the frontend with the REST API, handling loading and error states and input validation
- Worked in a professional Git workflow: feature branches, pull requests and code review
- Collaborated with a team on company projects, applying production web development practices

Game Developer, *Diamond Role Play (Diamond.rp)* 10/2019 - 06/2022
Remote

- Developed C++ plugins with custom native functions for a live SA-MP multiplayer server, called from Pawn where Pawn was too slow
- Built an asynchronous MySQL layer with a connection pool, plus NPC pathfinding, geometry and collision systems
- Worked with RakNet hooks: packet handling for a server-side anti-cheat and synchronization of custom objects
- Integrated HTTP/REST services for the player’s personal account area
- Created client-side ASI/DLL modules with MinHook and Dear ImGui: HUD, speedometer, minimap and a launcher with auto-updating resources
- Supported hundreds of concurrent players, focusing on performance and network stability
- Worked in a team on a live product using Jira and stand-ups

Programming Teacher, *IT-Friends* 03/2026 - 10/2026
Kyiv

- Teach programming fundamentals to children (10-11 y.o.) using Construct and Roblox Studio
- Design lessons and exercises; explain complex concepts in a simple, structured way
- Track each student's progress and adapt tasks to their pace; build algorithmic thinking

EDUCATION

BSc, Culinary Arts, *National University of Food Technologies* 09/2024 - 06/2028
Additional: Frontend course at Mate Academy; Professional Training Program at Glovo; self-directed learning (CodeWars).

Full-Stack Developer Program, *Mate Academy* 2025 - 2027

SKILLS

Frontend
React 18, React Router, Hooks, Context API, Next.js 14, TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS (BEM), Tailwind, Responsive Design

Backend & Data
Node.js, REST API, PostgreSQL, Prisma ORM, Supabase (Auth, Row Level Security), NextAuth / OAuth, SQL, Telegraf, Cheerio

Tools
Git & GitHub, Vite, Parcel, ESLint, Prettier, Stylelint, GitHub Pages, Vercel

Testing
Cypress (E2E), Jest, Vitest, Playwright

Other
Three.js, Framer Motion, PWA, Canvas / WebGL, Rust (Axum), basic C/C++, Agile (Scrum, Kanban)

AI & Automation
n8n Workflow Automation, Anthropic Claude API, LLM APIs (ChatGPT, Gemini), Prompt Engineering, REST API Integration, Cloud Functions

LANGUAGES

Ukrainian
Native

English
B1 (Intermediate)

German
A2

Middle full-stack developer with ~6 years in software development overall — including ~3 years of commercial C++ game development (game engine, network logic, real-time multiplayer systems) and ~3 years of commercial full-stack work. I build modern, fast and accessible interfaces with React and TypeScript, go full-stack with Node.js, Next.js and databases (PostgreSQL, Supabase), and build AI-powered automation with n8n and LLM APIs (Claude, ChatGPT, Gemini, Groq). 20+ projects with live demos.

PROJECTS

Hunter's Codex (Supernatural) , *Next.js 14, TypeScript, Prisma, PostgreSQL, NextAuth*

- Full-stack fan encyclopedia: 327 episodes via TMDB API, character profiles, bestiary, interactive map and a forum with user accounts.

DevMetrics Dashboard , *Next.js, TypeScript, Prisma, TanStack Query, Recharts*

- Developer dashboard PWA: GitHub metrics, Kanban board, Pomodoro and analytics. Tested with Vitest and Playwright.

Kopilka ,
Next.js 16, TypeScript, Supabase (Postgres, Auth, RLS), Tailwind CSS v4, Recharts

- Personal finance tracker: income/expense tracking, savings goals with auto-calculated monthly targets, category spending charts, magic-link auth with Row Level Security.

Minecraft Skin Viewer , *Three.js, WebGL, PWA*

- 3D skin viewer and editor: pixel editing, animation presets, GIF/WebM export and day-night lighting. No build step.
- + 13 more projects with live demos: resumesite-weld.vercel.app

LinkSnip , *Rust, Axum, Vercel Serverless*

- URL shortener and pastebin backend written in Rust, with flexible link expiration — ad-free and open source.

Bank Support Assistant , *Next.js, TypeScript, Tailwind CSS, Anthropic Claude API*

- AI-powered banking support chat: streaming responses via Claude API, searchable categorized FAQ knowledge base (cards, transfers, security, loans), quick-start prompts for common scenarios.
